Vamsi Deeduvanu

765-694-9091 | vamsi10010@gmail.com | linkedin.com/in/vamsideeduvanu/ | github.com/vamsi10010

Highly motivated student seeking Data Science and ML internships. Experienced in Java, Python, and C. Eager to learn more and expand technical expertise in the field of Machine Learning.

EDUCATION

Purdue University

West Lafayette, IN

Bachelor of Science in Computer Science and Data Science

Aug. 2022 - May 2025 (exp.)

- Coursework: Object Oriented Programming, Multivariate Calculus, Linear Algebra,
 Discrete Math, Probability, Statistics, Data Structures and Algorithms, Computer Architecture
- Clubs and Extracurriculars: ML@Purdue, Purdue Astronomy Club, Intramural Sports
- GPA: 4.0/4.0

Resonance Junior College

Hyderabad, India

Intermediate

June 2020 - May 2022

• Intermediate Public Examinations: 98.2%

• JEE Mains: 99.49th percentile all India

EXPERIENCE

Undergraduate Data Science Researcher

Aug. 2022 – May 2023

West Lafayette, IN

The Data Mine, Purdue University

- Partnered with Battelle on researching hyper-parameter optimization procedures for NLP models.
- Fine-tuned a BERT model from the HuggingFace library to recognize adverse drug events from electronic health records.
- Applied hyperband and population-based training algorithms from the RayTune library to tune hyperparameters and improved overall f1 score by more than 20%.
- Presented results in weekly sprint meetings with client and established a standard operating procedure as a reference for future projects.

PROJECTS

cgrad | C, cmocka, Deep Learning

Aug. 2023 – Present

- Programmed a lightweight C library to support backpropagation for optimizing neural networks.
- Implemented a directed acyclic graph to represent computational graph of a neural network and perform reverse auto-differentiation in runtime to calculate gradients.
- Created unit tests for library using cmocka to streamline testing process.
- Applied library to train a neural network to classify handwritten digits from MNIST dataset.

YourCollege | Python, Scikit-Learn, Pandas, Streamlit

Jan. 2023 – Present

- Developed a college recommender application to assist high school students in college search.
- Collected data from multiple sources and performed data cleaning and feature engineering for classification.
- Trained an unsupervised learning algorithm to create unique a classification of colleges and recommendations for every user based on their personal preferences.
- Built and deployed application on web through Streamlit to make it accessible to users.

Time Series Forecasting | Python, Statsmodels, Pandas, Keras, Matplotlib

Sep. 2022 – May 2023

- Collaborated with members of ML@Purdue to forecast PM-10 pollution levels in California.
- Implemented an ARIMA model from statsmodels library and LSTM model from Keras to predict PM-10 levels and compared results.
- Researched causes of pollution in California and presented results at club standup meetings.

SKILLS

Languages: Python, C, Java, SQL (Postgres), R, LaTeX

Developer Tools: Git, Bash, VS Code, Jupyter, PyCharm, IntelliJ

Libraries: PyTorch, HuggingFace, Keras, RayTune, Scikit-Learn, Streamlit, Pandas, NumPy, Matplotlib

Other Skills: Agile Development, Technical Writing, Communication, Leadership, Teamwork
